Thought for Thought

There is no sense in crying over spilt milk. - Sophocles

Tips & Information

The summer solstice occurs exactly when the Earth's and the moon's axial tilt is most inclined towards the sun, at its maximum of 23° 26'. Though the summer solstice is an instant in time, the term is also colloquially used like Midsummer to refer to the day on which it occurs. Except in the polar regions (where daylight is continuous for many months), the day on which the summer solstice occurs is the day of the year with the longest period of daylight. The Sun reaches its highest position in the sky on the day of the summer solstice. Make the most of it - see you in September!
